

Report of Monitoring and Evaluation of 2025 Programs/Activities/Projects (PAPs)

The Monitoring and Evaluation (M&E) of the 2025 Programs, Activities, and Projects (PAPs) of the Philippine Normal University (PNU) was undertaken to assess implementation progress, verify compliance with planned timelines and deliverables, and document outcomes to support evidence-based decision-making. The review covered PAPs implemented across the University's key domains — academic affairs, research and extension, finance and administration, student services, and institutional governance. Monitoring activities involved the systematic review of technical reports, minutes of meetings, travel authorities, and other supporting documents submitted by implementing offices. Initial monitoring results indicate that several major initiatives were supported by verified documentation and recorded outputs, demonstrating adherence to institutional monitoring requirements and established reporting mechanisms.

Complementing this process, the University implemented PAPs MoVer (Programs, Activities, and Projects Monitoring and Verification), an institutional mechanism designed to ensure that PAPs align with university priorities, adhere to implementation timelines, and deliver intended results. The PAPs MoVer process utilizes a structured approach that includes on-site or virtual inspections, document reviews, stakeholder consultations, and monitoring tools to validate program implementation and performance. Through this mechanism, the University reinforces transparency, accountability, and timely identification of implementation issues that may require corrective actions. Overall findings indicate that PNU maintained an active monitoring system for its 2025 PAPs, while also highlighting the need to further strengthen systematic documentation and post-activity evaluation to enhance institutional learning, program effectiveness, and evidence-based planning in future implementation cycles.

Title of PAPs	Date of Implementation	Date of Monitoring	Monitoring Report	Evaluation of Implementation
